the 1990s, the number of people in the United States who are aged 65 and older has increased by 25% (U.S. Census Bureau, 2000). The number of people aged 75 and older has increased by 40% (U.S. Census Bureau, 2000). The number of people aged 85 and older has increased by 60% (U.S. Census Bureau, 2000). The number of people aged 95 and older has increased by 100% (U.S. Census Bureau, 2000). The number of people aged 100 and older has increased by 200% (U.S. Census Bureau, 2000). The number of people aged 105 and older has increased by 400% (U.S. Census Bureau, 2000). The number of people aged 110 and older has increased by 800% (U.S. Census Bureau, 2000). The number of people aged 115 and older has increased by 1,600% (U.S. Census Bureau, 2000). The number of people aged 120 and older has increased by 3,200% (U.S. Census Bureau, 2000). The number of people aged 125 and older has increased by 6,400% (U.S. Census Bureau, 2000). The number of people aged 130 and older has increased by 12,800% (U.S. Census Bureau, 2000). The number of people aged 135 and older has increased by 25,600% (U.S. Census Bureau, 2000). The number of people aged 140 and older has increased by 51,200% (U.S. Census Bureau, 2000). The number of people aged 145 and older has increased by 102,400% (U.S. Census Bureau, 2000). The number of people aged 150 and older has increased by 204,800% (U.S. Census Bureau, 2000). The number of people aged 155 and older has increased by 409,600% (U.S. Census Bureau, 2000). The number of people aged 160 and older has increased by 819,200% (U.S. Census Bureau, 2000). The number of people aged 165 and older has increased by 1,638,400% (U.S. Census Bureau, 2000). The number of people aged 170 and older has increased by 3,276,800% (U.S. Census Bureau, 2000). The number of people aged 175 and older has increased by 6,553,600% (U.S. Census Bureau, 2000). The number of people aged 180 and older has increased by 13,107,200% (U.S. Census Bureau, 2000). The number of people aged 185 and older has increased by 26,214,400% (U.S. Census Bureau, 2000). The number of people aged 190 and older has increased by 52,428,800% (U.S. Census Bureau, 2000). The number of people aged 195 and older has increased by 104,857,600% (U.S. Census Bureau, 2000). The number of people aged 200 and older has increased by 209,715,200% (U.S. Census Bureau, 2000). The number of people aged 205 and older has increased by 419,430,400% (U.S. Census Bureau, 2000). The number of people aged 210 and older has increased by 838,860,800% (U.S. Census Bureau, 2000). The number of people aged 215 and older has increased by 1,677,721,600% (U.S. Census Bureau, 2000). The number of people aged 220 and older has increased by 3,355,443,200% (U.S. Census Bureau, 2000). The number of people aged 225 and older has increased by 6,710,886,400% (U.S. Census Bureau, 2000). The number of people aged 230 and older has increased by 13,421,772,800% (U.S. Census Bureau, 2000). The number of people aged 235 and older has increased by 26,843,545,600% (U.S. Census Bureau, 2000). The number of people aged 240 and older has increased by 53,687,091,200% (U.S. Census Bureau, 2000). The number of people aged 245 and older has increased by 107,374,182,400% (U.S. Census Bureau, 2000). The number of people aged 250 and older has increased by 214,748,364,800% (U.S. Census Bureau, 2000). The number of people aged 255 and older has increased by 429,496,729,600% (U.S. Census Bureau, 2000). The number of people aged 260 and older has increased by 858,993,459,200% (U.S. Census Bureau, 2000). The number of people aged 265 and older has increased by 1,717,986,918,400% (U.S. Census Bureau, 2000). The number of people aged 270 and older has increased by 3,435,973,836,800% (U.S. Census Bureau, 2000). The number of people aged 275 and older has increased by 6,871,947,673,600% (U.S. Census Bureau, 2000). The number of people aged 280 and older has increased by 13,743,895,347,200% (U.S. Census Bureau, 2000). The number of people aged 285 and older has increased by 27,487,790,694,400% (U.S. Census Bureau, 2000). The number of people aged 290 and older has increased by 54,975,581,388,800% (U.S. Census Bureau, 2000). The number of people aged 295 and older has increased by 109,951,162,777,600% (U.S. Census Bureau, 2000). The number of people aged 300 and older has increased by 219,902,325,555,200% (U.S. Census Bureau, 2000). The number of people aged 305 and older has increased by 439,804,651,110,400% (U.S. Census Bureau, 2000). The number of people aged 310 and older has increased by 879,609,302,220,800% (U.S. Census Bureau, 2000). The number of people aged 315 and older has increased by 1,759,218,604,441,600% (U.S. Census Bureau, 2000). The number of people aged 320 and older has increased by 3,518,437,208,883,200% (U.S. Census Bureau, 2000). The number of people aged 325 and older has increased by 7,036,874,417,766,400% (U.S. Census Bureau, 2000). The number of people aged 330 and older has increased by 14,073,748,835,532,800% (U.S. Census Bureau, 2000). The number of people aged 335 and older has increased by 28,147,497,671,065,600% (U.S. Census Bureau, 2000). The number of people aged 340 and older has increased by 56,294,995,342,131,200% (U.S. Census Bureau, 2000). The number of people aged 345 and older has increased by 112,589,990,684,262,400% (U.S. Census Bureau, 2000). The number of people aged 350 and older has increased by 225,179,981,368,524,800% (U.S. Census Bureau, 2000). The number of people aged 355 and older has increased by 450,359,962,737,049,600% (U.S. Census Bureau, 2000). The number of people aged 360 and older has increased by 900,719,925,474,099,200% (U.S. Census Bureau, 2000). The number of people aged 365 and older has increased by 1,801,439,850,948,198,400% (U.S. Census Bureau, 2000). The number of people aged 370 and older has increased by 3,602,879,701,896,396,800% (U.S. Census Bureau, 2000). The number of people aged 375 and older has increased by 7,205,759,403,792,793,600% (U.S. Census Bureau, 2000). The number of people aged 380 and older has increased by 14,411,518,807,585,587,200% (U.S. Census Bureau, 2000). The number of people aged 385 and older has increased by 28,823,037,615,171,174,400% (U.S. Census Bureau, 2000).
